

Firmware Update April 2018

VERY IMPORTANT INFORMATION

1. Remove power supply completely **before** loading Firmware (Standby LED light should not be ON)
2. Insert Firmware underside USB port of your TV
3. Once Firmware is inserted, plug in power supply. **DO NOT TURN TV ON WITH REMOTE.** Allow the Firmware to flash until the flashing stops
4. TV will turn OFF by itself. Please be patient and wait for the TV to turn itself ON again.
5. Once TV turns ON, select ENGLISH and press OK
6. Select DVB-T and press OK
7. Select NEW ZEALAND and press OK
8. Press EXIT on channel tuning. Press the left arrow on the keypad of the remote to exit and then exit once more
9. Press INPUT and move to SATELLITE
10. Unplug the power and remove the Firmware USB
11. Insert the Software USB to the side USB port of your TV and power TV back on
12. Ensure you are still on the SATELLITE Input then complete a software update:

1. Press MENU on the remote
2. Scroll down to 'Import Flash Clone' and press OK once and wait
3. TV will turn off automatically and turn ON again
4. Unplug power and remove USB

You have successfully updated your Firmware and Software.
