- Weight: external unit 11kg, mounting material and accessories 3kg.

To get the most from your expensive piece of hardware and the best viewing on your TV take the time to look after it. Satellite dishes by the nature of where they are on a vehicle (positioned on the top, exposed to all the elements) have a hard life and, they are often forgotten about as they are 'out of sight, out of mind'. The best thing for an Automatic Satellite dish is that it is used regularly and gets an annual service. During the Covid period many dishes were not used and this created problems for their users.
